Initial valueTest mode can be used to make only the feed base move in the same way as during normal sewing, but with the upper shaft stopped. ThisIndependent programCycle program Refer toThe work clamps will be lowered. The feed base will move to the sewing start position. When the final stitch is reached, the buzzer will Thread trimming and cutting operation will not be The number of remaining stitches 4 on the display will increasePress the start switch 6.No cutting. Cutting operations are not carried out. When "No cutting" is selected, the Cutting before sewing. Sewing is carried out after cutting has been When cutting before sewing isCutting is carried out after sewing has beenWhen cutting after sewing isThe cutting operation changes as shown in the illustration each time a key is pressed. The feed base can be moved forward from the standard material setting position. This can make it easier to set the material in place. Cycle time will be reduced with this setting, particularly if cutting after sewing is selected. The feed base will move forward to the sewing start position. This is used to thread the upper thread. Refer to "52. Threading the upper thread" for details on using the threader.. When the sewing machine switches to threading mode, the needle bar . This allows the needle bar and feed base to move freely, in order to make threading of the upper thread easier. In addition, threading mode is safe because the sewing machine will not operate when the start switch is pressed or the treadle is The tension discs will open. The buzzer will sound, and then the needle bar . After this, energization of the X, Y and Once the upper thread has been threaded, press the RESET key. After the home positions are detected, the needle bar and feed base will return to The tension discs will close.

If this is not done, the machine may operate if the start switch is pressed by mistake, which could result in seriousDo not touch any of the moving parts or press any objects against the sewing machine while sewing. If this is not observed, it may result in personal injury or damage to the sewing machine. When carrying out automatic sewing for the first time, be sure to carry out a test sewing first. In addition, if using the sewing machine when the ambient temperature is cold, carry out several test sewing operations to Independent program Cycle program Refer to Place the material to be sewn under the work clamps, and then press the work clamp switch 5. The work clamps will be lowered. Sewing will then start. The STOP switch is used to stop the sewing machine if a problem occurs such as a thread breakage. The sewing machine will stop and the buzzer will sound. Press the RESET key once more. After the home positions are detected, the needle bar and feed base will move to the The buzzer will stop sounding. The Automatic sewing will resume.
